DETAILED ACTION

Failure to Comply with 37 CFR 1.121(c)

1. Claim 13 should not be indicated as "(original)" because it has been amended.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Owens (US 5,148,512). Owens ('512) discloses a cylindrical conductor (11) made of aluminum (see col. 4, line 59).
4. Claims 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuehne (US 215,372). Kuehne ('372) discloses cylindrical conductors which are copper (see paragraph 6).
5. Claims 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Blais (US 2,313,315). Blais ('315) discloses a cylindrical conductor made of oxygen-free copper (see column 2 of page 2, lines 64-69).

6. Claims 9-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Korpan et al. (US 2005/0082038). Korpan ('038) discloses a cylindrical conductor made of oxygen-free copper (see [0024]).

Allowable Subject Matter

7. Claims 1-5, 8, 14-17 and 20 allowed.

Response to Arguments

8. Applicant states "independent claim 9 was amended to describe the holes in the barrel's wall thickness"; however, claims 9-13 are direct to a conductor. The barrel is not an element of the structure claimed in claims 9-13. Description of unclaimed elements does not result in the patentability of that which is claimed.

Conclusion

9. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
